INTRODUCTION

# Wireless Global Congress EMEA Vienna 2026

**On behalf of the entire Wireless Broadband Alliance (WBA), THANK YOU to all our attendees, members, sponsors, speakers and industry partners who helped make Wireless Global Congress (WGC) EMEA 2026 in Vienna such a tremendous success!**

This year's Congress brought together leading voices from across the global wireless ecosystem to explore the technologies, innovations and partnerships shaping the future of connectivity. From the evolution of Wi-Fi 7 and the emerging opportunities of Wi-Fi 8 and 6G, to the growing influence of Artificial Intelligence (AI), automation and network convergence, WGC EMEA 2026 highlighted an industry moving rapidly from innovation to real-world implementation.

Across two days of engaging presentations, panels and discussions, we explored some of the industry's most important opportunities and challenges. Key themes included the rise of autonomous and self-driving networks, AI-powered connectivity, enterprise Wi-Fi security, OpenRoaming™, and the convergence of Wi-Fi, cellular, satellite and IoT technologies. Discussions also examined how intelligent networks can transform connected homes, enterprises and communities, delivering more seamless, secure and reliable experiences for users worldwide.

It was particularly encouraging to see the breadth of expertise and collaboration throughout the Congress. From thought-provoking presentations by industry leaders at **Cisco, HPE, Intel, Qualcomm, Boingo Wireless, Airties, American Bandwidth, Ansys, Cambium Networks, eino.ai, Helium, Huawei, IronWiFi, OOKLA, RUCKUS Networks, Silicon Labs** and many others, to discussions on the future of managed services, connected properties and next-generation wireless infrastructure, the event reinforced the importance of working together to accelerate innovation and adoption.

Our WBA Members Only Working Sessions provided another valuable opportunity for collaboration, with members advancing discussions on OpenRoaming™, Wi-Fi 8, 6G convergence, enterprise security, Wi-Fi HaLow, quality of service and other critical initiatives. These conversations are central to WBA's mission of bringing the industry together to develop the standards, frameworks and solutions that will shape the next generation of wireless connectivity.

We were also delighted to celebrate the 2026 WBA Industry Awards, recognising the outstanding achievements, innovations and deployments making a meaningful impact across our industry. Congratulations to all our winners and finalists, and a special thank you to IronWiFi for sponsoring this year's Awards. It was a pleasure to recognise the organisations and individuals helping drive our industry forward.

Beyond the conference sessions, the networking opportunities and conversations between members, partners and industry leaders were equally valuable. Events like WGC remind us that meaningful progress is built not only through technological advancement, but also through the relationships, knowledge-sharing and collaboration that make innovation possible. Whether you're revisiting your favourite moments from Vienna or catching up on sessions you may have missed, I hope you enjoy reading through the WGC EMEA 2026 Post-Event Report.

As we look ahead, we're already working on some exciting plans and announcements for our 2027 events, with new opportunities to bring the global wireless community together, share knowledge and drive industry innovation. Stay tuned for more news in the coming months! I encourage you to continue these conversations, explore the opportunities ahead and remain engaged with WBA's initiatives as we build on the momentum from Vienna.

Once again, thank you for your continued support of WBA and the global Wi-Fi community. The momentum from Vienna is just the beginning, and we have some exciting developments and fresh initiatives in the works for 2027. Stay tuned - there's much more to come, and I look forward to shaping the future of wireless connectivity together!

WARM REGARDS

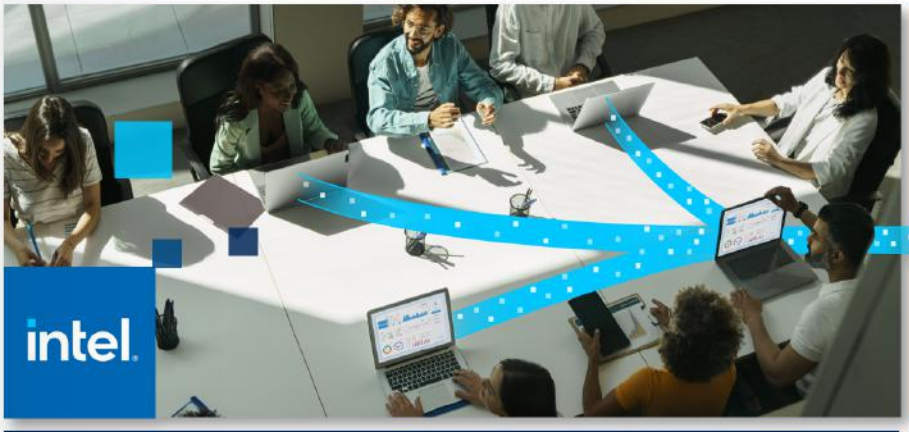

**Tiago Rodrigues**

**President & CEO,**
**Wireless Broadband Alliance**

# Intel Connectivity Analytics Program

Powered by Intel® Connectivity Analytics

## Create new and better experiences with unprecedented connectivity insights

### How it Works

Access valuable connectivity analytics from PCs across the network

### Deeper Connectivity Insights Improve Applications & Services

- Network Health
- Quality of Service
- Technical Support
- Security Assurance
- Sensing and Location
- UX Monitoring

### Let's Work Together to Deliver Amazing Connectivity Experiences

**Accelerate innovation & time to market**

Generate revenues via enhanced services with insights from Intel's large installed base

**Access Intel marketing resources**

Improve exposure and lead generation with Intel amplification

**Engage with Intel connectivity experts**

Facilitate development & optimization with Intel engineering support

## Join today! www.intel.com/ICA-Program

# WGC EMEA 2026

OCT 12 - OCT 15

## Wi-Fi Innovation: Connecting Our Digital World

VIECON – VIENNA CONGRESS & CONVENTION CENTER

## KEY DISCUSSIONS, INDUSTRY INSIGHTS & INNOVATIONS FROM VIENNA

### The Future of Wi-Fi: Wi-Fi 7, Wi-Fi 8 and Beyond

- **Qualcomm** highlighted the evolution towards Wi-Fi 8, with a greater emphasis on ultra-high reliability, predictable performance and next-generation connected experiences.
- **CableLabs** explored the importance of translating technical innovation into practical, deployable solutions, helping accelerate the adoption of next-generation Wi-Fi technologies.
- **Cisco, HPE** and **RUCKUS Networks** were among the major industry players contributing to the wider conversation around enterprise Wi-Fi innovation, network performance and the evolution of wireless infrastructure.
- **Boingo Wireless** shared perspectives on deploying Wi-Fi 7 alongside cellular infrastructure, highlighting the importance of secure, high-performance connectivity in complex environments.

### AI, Automation and Intelligent Wireless Networks

- **Airties** explored how agentic AI, changing traffic patterns and increasingly complex connected homes are creating new demands for intelligent Wi-Fi management.
- **eino.ai** highlighted the role of AI-driven network intelligence and the importance of collaboration between operators, technology providers and software companies.
- **Qualcomm** discussed how next-generation Wi-Fi technologies can support AI-enabled devices through low-latency, highly reliable connectivity.
- **Cisco, HPE** and **Silicon Labs** were among the technology companies relevant to wider discussions on intelligent networking, connected devices and the evolution towards more automated wireless environments.

### Seamless Connectivity: Wi-Fi, Cellular and Network Convergence

- **Boingo Wireless** highlighted the importance of bringing together Wi-Fi, 5G and private wireless networks to deliver seamless connectivity across airports, transport hubs and large venues.
- **Helium** explored how Wi-Fi and distributed antenna systems (DAS) can work as complementary technologies to improve indoor coverage and carrier connectivity.
- **Cisco, HPE** and **Boldyn Networks** were among the companies contributing to the broader industry focus on converged connectivity, enterprise networking and wireless infrastructure.
- WBA's OpenRoaming™ and Passpoint initiatives demonstrated the importance of secure, interoperable connectivity and simplified network access across different environments.

## OpenRoaming™, Carrier Offload and Quality of Experience

- **Helium** highlighted the commercial value of WBA's Access Network Metrics initiative, using network performance data to give carriers greater visibility and control over Wi-Fi offload.
- **Ookla** emphasised the importance of measuring real-world network performance and bringing end-user experience data into industry discussions.
- **Boingo Wireless** explored how seamless connectivity across different wireless technologies can improve the experience for users in high-density public environments.
- WBA members and industry partners discussed how OpenRoaming™, standardised network metrics and greater interoperability can improve carrier confidence, network performance and customer experience.

## Enterprise Connectivity, Security and New Growth Opportunities

- **Cisco** and **HPE** were among the major technology providers associated with the industry's focus on enterprise wireless networking, secure connectivity and converged infrastructure.
- **Boingo Wireless** and **Boldyn Networks** highlighted the wider opportunity for advanced wireless connectivity across complex enterprise and venue environments.
- The panel "Managed Services Beyond Connectivity: Are Managed Services the Next Telecom Growth Engine?" explored opportunities for service providers to develop new revenue streams and value-added services.
- **RUCKUS Networks** and **Airties** were among the companies relevant to discussions on network management, service quality and delivering reliable connectivity experiences.

## Innovation Forum: From CTO to Deployment

- **CableLabs** emphasised WBA's role in transforming technical innovation into practical, deployable solutions through industry collaboration.
- **Qualcomm** highlighted the importance of WBA in identifying emerging trends and translating service-provider requirements into future technology development.
- **eino.ai, Helium** and **Ookla** demonstrated how developments in AI, network intelligence and performance measurement can help bridge the gap between innovation and real-world application.
- WBA and its global member ecosystem reinforced the importance of collaboration between operators, chipset manufacturers, infrastructure providers and technology innovators in shaping the next generation of wireless connectivity.

To find out more, listen to the Wireless Global Congress EMEA replays or download the presentations.

# WGC TESTIMONIALS & PHOTO HIGHLIGHTS

boingo wireless

**"WBA brings the entire industry together, allowing companies like Boingo to identify opportunities, collaborate and deliver better connectivity."**

*– Boingo Wireless*

**"WBA is really early and quick in picking up on new trends and being responsive to them.** It brings forward requirements that are relevant to our service provider customers, allowing us to integrate these into our products."

*– Qualcomm*

Qualcomm

eino

"It's very important that all these different players work together and come up with solutions as a team to progress much faster. **Alliances like WBA facilitate that globally, bringing people together in the same room."**

*– eino.ai*

OOKLA

"I've been quite impressed by the collaboration that happens across the industry. **Different providers, from different backgrounds, all come together to make sure we're moving in the same direction when it comes to customer experience."**

*– Ookla*

**"Ecosystem collaboration in our industry is super important.** The complexity within the connected home is growing, and the ecosystem needs to work together to prepare for the next wave of AI and its adoption by subscribers."

*– Airties*

airties

helium

"Through WBA's Access Network Metrics initiative, we're turning Wi-Fi performance data into actionable insights, giving carriers greater visibility, control and confidence to deliver a better connectivity experience for end users."

*– Helium*

# WGC EMEA PHOTO HIGHLIGHTS

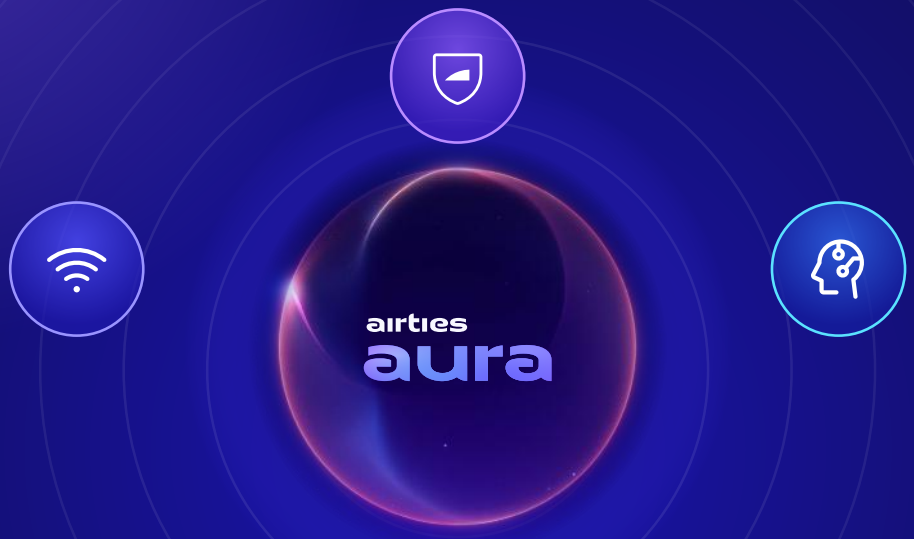

# The future connected home needs autonomous intelligence

The connected home is becoming increasingly complex as devices, applications, AI assistants and services converge. It is where subscribers work, game, shop and stream. Deliver exceptional experiences at home, and reduce churn.

**Airties Aura** is the Agentic AI intelligence layer that sits between the connected home and the operator's AI ecosystem, turning connected-home insight into action for the best and most secure broadband and Wi-Fi experience.

### Smooth, Smart Connectivity

- Self-healing experiences and Intelligent optimization
- Natural-language interactions for self-care, customer care, marketing and engineering

### Cybersecurity for All

- Protect subscribers against emerging AI-enabled threats
- Meet rising subscriber expectations and protect at incremental integration cost

### Ecosystem Intelligence

- Turn connected-home data into business value
- Show trends across devices and applications for the connected home ecosystem

**Airties Aura is the Agentic AI engine powering Homes, MDUs and SMBs with autonomous intelligence.**

## Learn More by downloading our market reports:

Discover how operators can turn Agentic AI investments into measurable business outcomes.

Explore why protecting every subscriber is becoming a strategic imperative in the AI era.

**Autonomous intelligence for smooth, smart, secure connectivity**

WBA MEMBERS-ONLY WORKING SESSIONS

# A New Participation Milestone

The **WBA Members-only Working Sessions**, held on **October 12–13 in Vienna, Austria**, marked our first-ever event in the city and set a **new participation record, with 200+ attendees, including representatives from 81 member companies**.

Building on the strong momentum of WBA's ongoing technical programs, the two-day program **featured 23 sessions** covering the active programs of the WBA 2026 Roadmap.

**Key session highlights:**

- **Operator Managed Wi-Fi:** Open discussion on the implementation model for the upcoming WBA Certification program, building on the previously developed Technical Specification and recently completed Test Plan.
- **WBA OpenRoaming™:** A forward-looking discussion on the program's evolution, including enhanced signaling, quality of experience, critical access, security, and the next generation of technical standards.
- **Wi-Fi HaLow:** Nexcomm Systems demonstrated the WBA Wi-Fi HaLow testing setup, featuring a smart thermostat connected to a Wi-Fi HaLow access point and transmitted device data across the network. The demonstration showed how Wi-Fi HaLow can support connected-building and IoT applications that need extended range, lower power consumption, and reliable connectivity.
- **5G & 6G Convergence:** Discussion focused on progress in convergence requirements, collaboration with 3GPP, and addressing sticky client behavior to improve mobility and user experience.
- **Passpoint® Quick Start Guide:** A review of global initiatives to accelerate Passpoint adoption among Access Network Providers, complemented by an interactive workshop introducing AI-driven working methodologies.

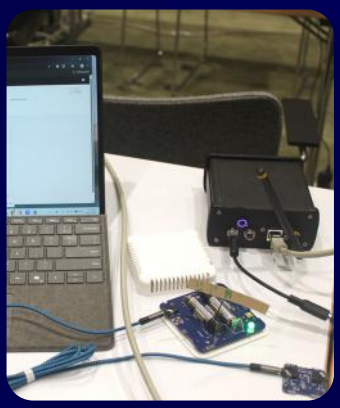

Beyond the technical sessions, our Members Dinner brought the members together for an evening of networking, provided a valuable opportunity to strengthen industry relationship, enhance ideas and foster collaboration.

**The two-day event demonstrated strong industry engagement and continued progress across WBA's technical programs, marking another important milestone for the WBA community.**

A week of highlights and many looking forward to the next sessions in **Japan!** Don't miss out — **book your place today!**

WGC EMEA – OPENROAMING™ AND COMPLIANCE TESTING

# OpenRoaming™ at WGC Vienna!

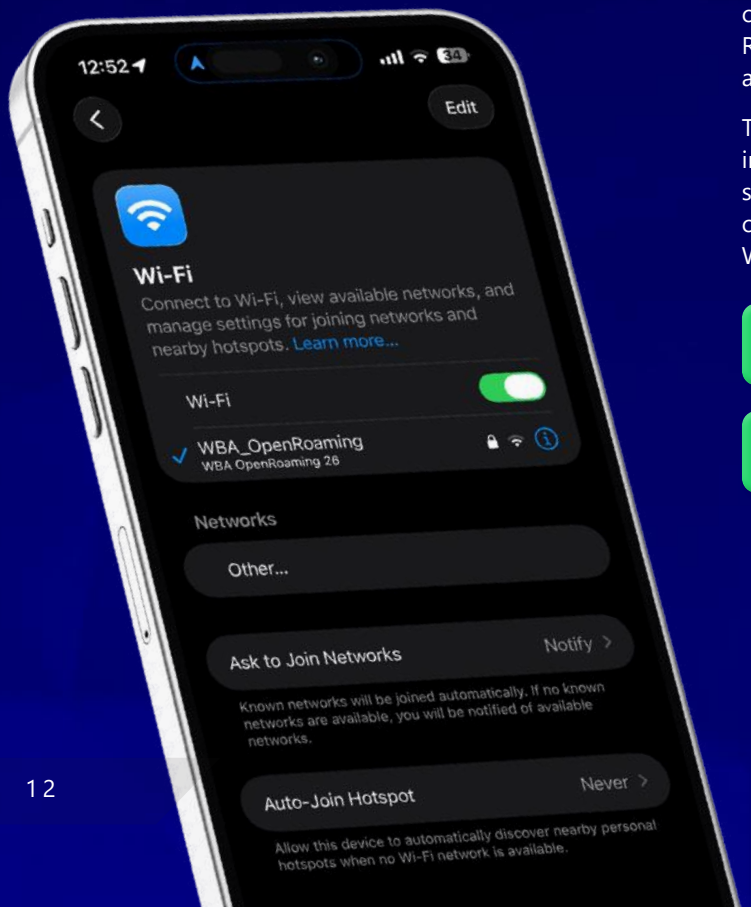

**During WGC Vienna 2026, WBA OpenRoaming™ enabled seamless and secure Wi-Fi experience across the venue. at VIECON Mess Wien. The deployment was supported by Cisco access points which provided the wireless coverage under Cisco Wireless LAN Controller (WLC) management. The Cisco Catalyst 9500 SVL supported the wired network for the OpenRoaming™ client VLAN. Single Digits acted as the OpenRoaming™ hub, helping connect the venue network with the wider OpenRoaming™ ecosystem.**

Key network performance highlights:

- 77,621 association sessions from 843 distinct client MAC addresses
- 1.12TB of total network traffic
- 431 simultaneous connected clients during the busiest recorded hour

Capport (DHCP Option 114) was enabled on the OpenRoaming™ network.

These results demonstrated OpenRoaming™'s ability to support connectivity at international congress scale with significant network usage.

## OpenRoaming™ Compliance Session

The WBA OpenRoaming™ Compliance Testing session brought together 7 access-network-equipment test entries from Cisco, Alta Labs, Quantum Networks & Arista Networks.

New Certified OpenRoaming™ Solutions:

| Cmpany | Certified Wi-Fi 7 Access Points | Controller / Cloud Solution |
|---|---|---|
| Alta Labs | AP7-Pro | 3 |
| Arista | C-360 | 21.1.0F |
| | AP5020 | 21.1.0F |
| Cisco | CW9178I (Wi-Fi 7) | MR 32.2.4 |
| Quantum Networks | QN-I-710 | 7.5.4.B9 |
| | QN-I-720 | 7.5.4.B9 |
| | QN-I-740 | 7.5.4.B9 |

The testing covered Android, iOS and Windows client testing, with a mix of Wi-Fi 7 platforms and established enterprise access-network solutions. The session provided vendors with a practical environment to test OpenRoaming™ interoperability and validate implementation capabilities.

Identity-provider testing included four EAP-TTLS providers: **Quantum Networks, Nomad Rail, CV Comms** and **Solução Network**. Connect-Info testing involved **Alta Labs, Cisco** and **Arista**. The declared scope included Connect-Info configuration and Connect-Info accuracy test cases; the RADIUS-related scopes remain subject to test-environment availability.

The compliance testing reinforced OpenRoaming™ interoperability across access-network and identity-provider solutions, supporting WBA's continued efforts to advance compliance, accelerate adoption, and deliver seamless, secure Wi-Fi connectivity across the global ecosystem.

BENEFITS OF WBA MEMBERSHIP

# BUILD YOUR SUCCESS THROUGH THE WBA

Joining the WBA connects your organisation with other members from across the industry, helping to grow your business and fostering ongoing, valuable partnerships.

WBA members address real business issues and opportunities. Our members are at the centre of the WBA initiatives that are shaping the wireless ecosystem which is full of challenges and opportunities!

**TECHNICAL ADVANCEMENT:**
Collaborate to solve technical issues and create innovative solutions

**ENGAGEMENT:**
Build awareness and generate new leads through marketing engagement and business development

**NETWORKING:**
Expand your community, develop your relationships and establish new contacts

**THOUGHT LEADERSHIP:**
Demonstrate your expertise and leadership and influence the future direction of the industry

**SPEED TO MARKET:**
Take advantage of the WBA community and its marketing channels

# WAA Secretary-General Discusses WLAN Standardization and AI Integration at WGC EMEA 2026

On October 15, Crane H. Yang, Secretary-General of the World WLAN Application Alliance (WAA), delivered a keynote address at WGC EMEA 2026 in Vienna, Austria, sharing insights into WLAN user experience, standardization and the integration of AI and WLAN.

Dr. Yang noted that WLAN now carries 70% of global endpoint traffic, yet experience issues such as insufficient coverage, unstable connections and roaming interruptions continue to increase operational pressure on operators. With application experience at its core, WAA has developed an integrated framework linking standard development, testing and certification, and adoption in real-world scenarios. The framework makes network experience measurable and verifiable across six dimensions: bandwidth, roaming, security, connection, latency and coverage. WAA has published 44 standards, with another 12 under development, and is advancing their application in projects including Shenzhen Bao'an International Airport and Peking University Shenzhen Hospital.

To advance AI and WLAN integration, WAA brings together expertise from industry, academia and research institutions through dedicated research groups and its newly established Academic Committee. Research spans AI-WLAN, spectrum, security and intelligent operations and maintenance, supporting technological innovation and the evolution of standards. Dr. Crane called on the global industry to strengthen collaboration, address shared challenges and advance standards, certification and practical applications together, building an ecosystem for high-quality WLAN.

Crane H. Yang

# Wireless Broadband Alliance Industry Awards 2026

WBA INDUSTRY AWARDS

WBA Industry Awards honor the most significant innovations and achievements from across the Wi-Fi ecosystem.

## 2026 AWARD WINNERS

- BEST WI-FI NETWORK OPERATOR
- BEST WI-FI NETWORK TECHNOLOGY
- BEST IN-HOME WI-FI NETWORK
- BEST ENTERPRISE WI-FI NETWORK
- BEST WI-FI FOR SOCIAL IMPACT
- BEST WI-FI INNOVATION
- BEST WI-FI CUSTOMER EXPERIENCE
- BEST OPENROAMING™ DEPLOYMENT

## WHY ENTER THE AWARDS?

- WBA Industry Award is a unique opportunity to demonstrate industry excellence and innovation for your company.
- Gain industry-wide recognition and awareness of the contributions your company has made with its outstanding projects & services.
- Winning the prestigious awards can be a major boost for your company's profile and business opportunities with WBA marketing campaign.
- Shortlisted companies and winners will be promoted on WBA channels to celebrate their successes and achievements & will receive 2 complimentary passes to the WGC event.
- Shortlists and winners will be featured by WBA in the Industry Case Study series with full marketing coverage.

## SUBMIT YOUR INNOVATIONS FOR THE WBA INDUSTRY AWARDS 2027!

**SUBMISSION:** MARCH 1, 2027
**DEADLINE:** JUNE 30, 2027
**AWARDS CEREMONY:** OCT 20, 2027

**VISIT THE AWARD SITE HERE!**
wballiance.com/wba-industry-awards/

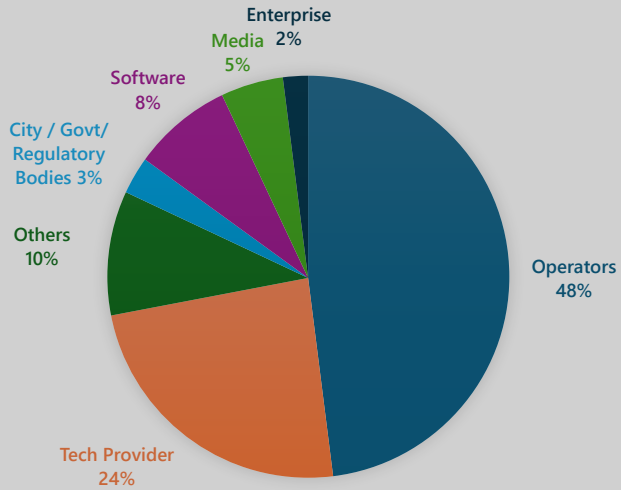

## CELEBRATING SUCCESS & LOOKING AHEAD TO TOKYO!

**Thank you** to all our Sponsors, guests and attendees for making WGC EMEA 2026 such a positive experience amongst industry leaders. In total, engaging with 1,030 unique organizations.

To make sure you don't miss out on any upcoming events or activities happening, sign up **here**. Find out more about becoming a WBA Member **here**.

We hope to see you at our next event, the Wireless Global Congress APAC, in Tokyo, Japan!

# WBA PROGRAMS

## 5G/6G WORK GROUP

- 6G & WI-FI REQUIREMENTS
- MISSION CRITICAL & EMERGENCY SERVICES
- 5G & WI-FI CONVERGENCE – EDGE ROAMING CASES
- SATELLITE COMMUNICATIONS – USE CASES & CONVERGENCE
- PRIORITIZING WI-FI CALLING
- WI-FI DAS FOR INDOOR CONNECTIVITY

## IOT WORK GROUP

- ENTERPRISE SECURITY FOR PRIVATE 5G NETWORKS
- WI-FI HALOW FOR IOT APPLICATIONS – APAC/EMEA FIELD TRIALS
- WI-FI SENSING
- MDU SMART LIVING TECHNICAL BLUEPRINT

## NEXTGEN WORK GROUP

- AI/ML FOR WI-FI – PHASE 2: POCS
- E2E WI-FI QOS – QOS MANAGEMENT
- E2E WI-FI QOS – L4S
- E2E WI-FI QOS – EDCA PARAMETERS OPTIMIZATION GUIDELINES
- WI-FI 7 – PHASE 2 TRIALS: MLO & LATENCY
- WI-FI 8
- WI-FI DESIGN STANDARD
- POST QUANTUM CYBERSECURITY

## OPENROAMING™ WORK GROUP

- OPENROAMING™ FOR IOT & FIDO DEVICE ONBOARD (FDO)
- OPENROAMING™ FOR PRIVATE CELLULAR
- OPENROAMING™ COMPLIANCE TESTING
- OPENROAMING™ IMPLEMENTERS GROUP

## ROAMING WORK GROUP

- WI-FI MONETIZATION & BUSINESS MODELS
- DISTRIBUTED LEDGER TECHNOLOGY (DLT) FOR WRIX
- RADIUS COMPLIANCE PROGRAM
- WRIX-S – SECURITY STANDARD

## TESTING & INTEROPERABILITY WORK GROUP

- ACCESS NETWORK METRICS (QOE)
- OPERATOR MANAGED WI-FI
- PASSPOINT FEATURES & PROFILE FORMAT
- MULTI DEVICE WI-FI PROFILE STANDARD
- WIRELESS LOCATION TECHNOLOGIES

## APAC GROUP

SEE MORE

## POLICY & REGULATORY AFFAIRS WORK GROUP

- 6GHZ RF STUDY FOR TRAINS
- WI-FI 6GHZ AFC TASK GROUP
- SEE MORE

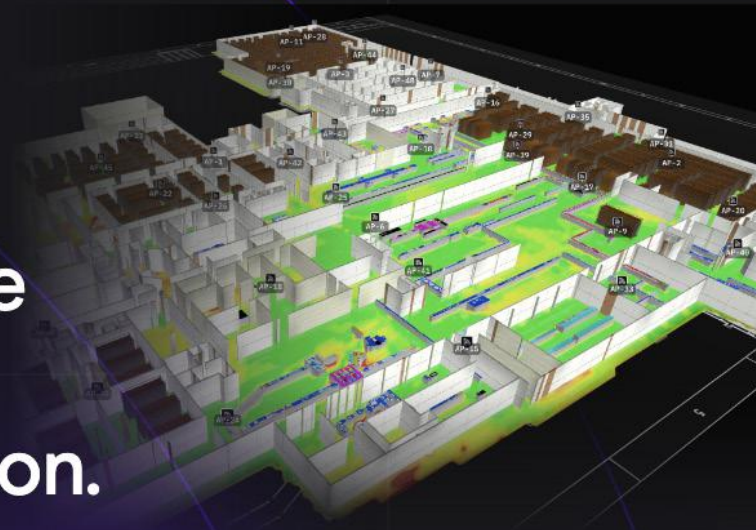

## MARKET WORK GROUP

eino.ai

The shortest path to intelligent connectivity.

# Resolving the wireless AI paradox unlocks **4x ROI**

Get the report

## PARTICIPATE IN OUR INITIATIVES

The WBA invites industry experts to participate in its 2027 projects.
Contact WBA team to get involved in key initiatives, including:

- **Wi-Fi 8**
- **6G Wi-Fi Requirements**
- **Operator-Managed Wi-Fi**
- **Multi-Dwelling Unit (MDU) Centralized Connectivity Management**
- **Wi-Fi Monetization & Business Models, and many more...**
